SUMMARY

Data Analyst with hands-on experience in logistics operations, data analysis, and supply chain optimization within the automotive and tech sectors. Skilled in ERP systems (Infor LN), SQL, Power BI, and Python for enhancing freight visibility, automating reporting, and ensuring high-quality data-driven decisions. Proven ability to streamline freight processes, manage vendor performance, and deliver improvements in line with operational KPIs and budget goals.

SKILLS

- **Analytics & Reporting:** SQL, Excel, Tableau, Power BI, Power Query, Power Automate, Git
- **Tools & Automation:** Python, A/B Testing, Dashboard Design, Data Cleaning & Validation
- **Soft Skills:** Communication, Time Management, Stakeholder Engagement, Deadline Management, Problem Solving

PROFESSIONAL EXPERIENCE

Data Analyst and Admin, Aston Martin Lagonda ⓘ 09/2024 – present | Gaydon, United Kingdom

Aston Martin, a British luxury automotive leader, my role here is mainly to streamline supply chain and logistics data, optimize reporting, and automate reconciliation processes to enhance operational efficiency.

- Designed and built **dynamic Power BI dashboards** and KPI reports to monitor logistics and inventory flows, improving planning efficiency and reducing operational costs by **30%**.
- Automated **data validation and reconciliation workflows** using Power Automate and Python, cutting manual workload and improving data accuracy across logistics reports.
- Collaborated with planners to develop **forecast accuracy models** and inventory dashboards using Excel, reducing material shortages and improving procurement responsiveness by **18%**.
- Presented **weekly KPI insights** to management, guiding operational decisions on shipment priorities and resource allocation.
- Led the **ERP migration project** for the Logistics department, transitioning from Goldcrest to Infor LN, ensuring data integrity and minimal operational disruption during system cutover.

Customer Service SMART Advisor, Intelcia Group ⓘ 12/2023 – 09/2024 | Glasgow, United Kingdom

- Designed dashboards in **Power BI** to track KPIs, improving team productivity by 10% and reducing call handling time by 8%.
- Conducted in-depth **process analysis** of customer journeys, increasing SMART meter adoption rates by 15%.
- Supported performance reporting and data-driven decision-making across operations.

Business analyst Apprentice, University of Strathclyde ⓘ 01/2023 – 01/2023 | Glasgow, United Kingdom

I completed a 3-week apprenticeship with Vocalista, a tech and data science company building a cloud-based travel platform. I developed a universal tagging system in Excel, ensuring accurate data categorization and visualization.

- Analyzed and mapped socio-economic, cultural, and environmental data to UN SDGs using **Excel**.
- Designed clear, insight-driven visualizations in PowerPoint for stakeholder presentations.

Performance Sports Analyst, Hudl ⓘ 09/2021 – 04/2022 | Mumbai, India

Hudl, a sports performance analytics company, brought me on board to extract and analyze sports data, providing insights to enhance player performance and coaching strategies.

- Analyzed **player & team performance records**, uncovering key insights using complex SQL queries for coaches and analysts.
- Created **interactive dashboards** that improved performance tracking, increasing efficiency by **25%**.
- Conducted in-depth **video analysis with Wyscout**, improving data accuracy by **20%** for scouting & player evaluation.

EDUCATIONAL QUALIFICATION

MSc. Business analysis and Consulting, ⓘ 09/2022 – 11/2023 | United Kingdom
University of Strathclyde ⓘ

BSc. Information Technology, Mumbai University ⓘ 04/2015 – 11/2019 | India
